

FIGHTING COMMERCIAL FACILITY CORONAVIRUS

OVERVIEW:

After a case of SARS CoV-2 had been confirmed within the confines of a commercial facility spanning over 43,000 ft², the owners proceeded to take immediate action. The facility was immediately closed following the discovery, and attention was immediately turned to procuring a powerful facility disinfection to ensure that 50 employees could return to a healthy environment. To address the situation they had reached out to local TOMI representative, White Knight Enviroforensics.

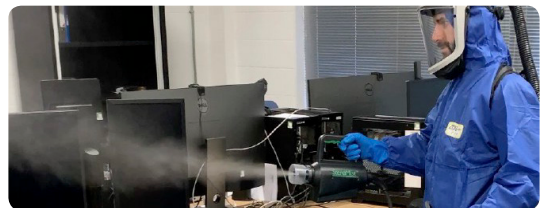

SCOPE OF WORK:

FACILITIES: Commercial Facility

AREA TO BE TREATED: 43,000 ft²

STERAMIST UNITS USED: Surface Unit

STERAMIST TECHNICIANS: 2

MEETING THE NEED:

In order to make the biggest impact, White Knight Enviroforensics set out to understand the needs of the facility and the employees within, prioritizing the company with essential workers in the face of an ongoing Coronavirus pandemic to ensure the job was addressed immediately and thoroughly.

THE RESULT:

Using only 2 technicians, a SteraMist[®] Surface Unit, and 3 Gallons of BIT[™] solution, White Knight was able to offer a powerfully fast and effective high-level disinfection to the facility. For added convenience, results were validated by the in-house laboratory at White Knight, allowing the employees to return the next day.
